<b>Summary</b>	Error message overlaps with Password field on the login page	Checkout button works with empty cart on the cart page	First Name validation error persists after entering valid data on checkout page	Active user is redirected to Login page after 20 minutes	Cart item counter does not update after removing product
<b>Pre-conditions</b>	User is on the Login page <a href="https://www.saucedemo.com/">https://www.saucedemo.com/</a>	User is logged in	User is logged in	User is logged in	User is logged in Multiple products are added to the cart
<b>Steps</b>	1. Open login page 2. Incorrect data entered or fields left blank 3. Click Login button	1. Log in to the application 2. Navigate to the Cart page without adding any products 3. Click the Checkout button	1. Leave First Name field empty 2. Fill in other required fields 3. Click Continue 4. Enter a valid value into First Name field 5. Click Continue again	1. Log in to the application 2. Actively use the website (browse products, navigate between pages) 3. Wait approximately 20 minutes	1. Add two or more products to the cart 2. Navigate to the Cart page 3. Remove one product 4. Observe the cart icon counter
<b>Expected result</b>	The error message is displayed correctly and does not overlap the input fields	Checkout should not be available for an empty cart (button should be disabled or an error message should be shown)	Red highlight and error icon disappear after entering valid data	User session should remain active while the user is active	Cart item counter is updated correctly after product removal
<b>Actual result</b>	The error message overlaps with the Password field, the text is hard to see	Checkout button is active and allows proceeding with Checkout with an empty cart	First Name field remains highlighted in red and error icon is still present	User is automatically redirected to the Login page	Cart item counter is not updated or shows incorrect number
<b>Post-condition</b>				User session is terminated and re-login is required
